

THE NEW CK75: ULTRA-RUGGED. ULTRA-POWERFUL. ANDROID AND WINDOWS.

We're sending you this message because our records indicate you purchased an Intermec CK71 ultra-rugged mobile computer in the past.

Are you thinking about upgrading your mobile computer fleet? Honeywell would like to introduce you to our all-new CK75 ultra-rugged mobile computer.

The CK75 offers the same rugged durability as its popular predecessor, the CK71 – but with a faster processor, enhanced near/far scanning capabilities and a more ergonomic form factor. In fact, it's 31% smaller and lighter than others in its class.

The best part: The CK75 supports both Windows® Embedded Handheld 6.5 and Android™ 6.0. So you can continue to benefit from your current investments, while preparing your business for the future. Now, that's investment protection.

RUGGED AND READY FOR YOUR BUSINESS TODAY – AND TOMORROW

We're sending you this message because our records indicate you purchased an Intermec CK71 ultra-rugged mobile computer in the past.

Upgrading your mobile computer fleet shouldn't impact your operations, or your bottom line. In fact, doing so should ultimately enhance both.

The new Honeywell CK75 ultra-rugged mobile computer – successor to our popular CK71 – is designed to make upgrading to next-generation mobile technology easy and hassle-free. Extend your legacy investments in Windows® Embedded Handheld 6.5, while preparing for a future transition to Android™ 6.0 – the CK75 supports both.

And throughout the migration, take advantage of your current investments by continuing to use the same batteries, peripherals, accessories and software as before – no need to rewrite software or retrain your employees.

MAKE THE SWITCH TO MORE: MORE POWER, MORE DURABILITY, MORE CHOICE

We're sending you this message because our records indicate you purchased an Intermec CK71 ultra-rugged mobile computer in the past.

Windows® Embedded Handheld 6.5 is nearing its end of life. But you don't have to make the switch to another OS now if your business isn't ready.

That's because Honeywell's new CK75 ultra-rugged mobile computer supports both Windows Embedded Handheld 6.5 and Android™ 6.0 operating systems. Now your business has the option of extending your WEH6.5 investment, then seamlessly transitioning to Android.

You'll get all the rugged durability of your existing CK71 devices – with a faster processor, powerful near/far scanning capabilities and an enhanced camera. All in a more ergonomic form factor that is 31% smaller and lighter than others in its class.

Is your business ready to make the switch?
