

RUGGED AND READY FOR YOUR BUSINESS TODAY – AND TOMORROW

Are your mobile computers meeting the demands of your warehouse and DC operations? You need a device that can withstand demanding environments while still being agile and responsive to any situation.

The new CK75 fits the bill with an unbeatable combination of durability and ergonomics – an ultra-rugged design that can survive 8 foot drops to concrete, but is 31% smaller and lighter than other devices in its class. This keeps your workforce productive, while reducing errors from fatigue.

And with support for both Windows® Embedded Handheld 6.5 and Android™ 6.0, the CK75 prepares your business – and your mobile workers – for the future.

ONE ULTRA-RUGGED DEVICE. A CHOICE OF TWO OPERATING SYSTEMS.

Is your warehouse or DC operation ready to transition to Android™ 6.0? Or, would you prefer to wait and get every last bit of benefit from your investment in Windows® Embedded Handheld 6.5?

Now, there's a single mobile computing device that lets you do both. Honeywell's CK75 ultra-rugged mobile computer supports both operating systems – so you can extend support for WEH, then convert your CK75 devices to the next-generation OS when your business is ready.

Get investment protection in an ultra-rugged device that leads its class in both durability and ergonomics – the new CK75.

FAST, RESPONSIVE AND HIGHLY EFFICIENT SCANNING FOR YOUR DC

To ensure accuracy and increased traceability in your warehouse, you need a device with superior scanning ability. Honeywell meets that need with the new CK75 ultra-rugged mobile computer.

The CK75 delivers extreme read ranges and lightning-fast performance using proven Honeywell imaging engines. It provides the quickest, most accurate reading of 1D and 2D barcodes – from 6 inches to up to 50 feet away.

Speed your warehouse workflows with unmatched scanning performance in one ultra-rugged, ergonomic device: the CK75.
