# GRANIT™

**YOU CAN BEAT UP THIS BOX**

But You Can't Beat What's Inside

**Honeywell**

**NOT FRAGILE**

Contents produced to stand up under harsh,  
rugged, often-brutal conditions and the  
unrelenting demands of time.

**Honeywell**

# TAKES A BEATING LOVES THE COLD AND NOW GOES THE DISTANCE

Take the scanner for a spin: test out the long-range scanning capabilities with the retro-reflective labels found below. Try it at 25, 35, even 45 feet away.

MEET

# GRANIT™ - 1280iFR -

Introducing the newest addition to the ultra-rugged Granit scanner range: the 1280i full range laser scanner. Engineered to go the distance, the 1280i reads barcodes out to 54 feet, or as close as 3.5 inches! And since it's built Granit Tough, you know it can handle all the drops, tumbles and punishment your workers can dole out.

GRANIT™

## KEY FEATURES

- Class-leading durability
- Full range linear depth-of-field
- Outstanding scan performance on poor quality, damaged, or shrink-wrapped codes
- Variety of visual indicators for loud or poorly lit environments
- Optional industrial-grade cable withstands the harshest environments (e.g. cold storage)

**THIS ISN'T JUST A LONG RANGE SCANNER:**

Granit 1280i can also read fine-resolution codes (as small as 7.5 mil) from a mere 3.5 inches away. Talk about versatility!
