

From admission to patient bedides, solutions designed to meet your greatest challenges.

Increasing Patient Safety. Reducing Errors. Improving Efficiencies.

According to U.S. Food and Drug Administration, hospitals could eliminate 50 percent of their medication administration errors by scanning bar codes at the point of care to positively identify patients, the medication they are about to receive and match the information to a physician order.

From FDA rules on recordkeeping to HIPAA requirements on privacy and protection, you need specific solutions that can adapt to increasing regulations and work with your existing systems and technology. It's because of our extensive knowledge of healthcare regulations, applications and processes that organizations look no further than Intermec for safe, effective bar code and tracking solutions.

Partner Name and Intermec bring you solutions designed to protect patient safety and reduce errors, implement bar-coded durable wristband solutions to ensure accurate identification of patient records, barcode patient charts, medications and records and ensure correct specimen to patient relationship - every time.
