# Medallion® Rental Services

- **Provides short term access to state-of-the-art mobile computing equipment**

- **Ideal solution for seasonal fluctuations or other occasional business events**

- **Reduces unnecessary capital expenditures, storage and maintenance costs**

- **Allows you to reserve equipment up to three years in advance**

- **Comprehensive offering includes service, accessories and software**

- **Easy to deploy in Windows Mobile environments**

The pace and competitiveness of business today doesn't allow for missed deadlines. Dealing with seasonal peak periods or unpredictable sales cycles can challenge even the most efficient work force, increasing the chance of delays, errors and potential damage to your bottom line.

By providing short term access to Intermec rugged mobile computers or printers, the Intermec Rental Services Program will allow you to properly equip your temporary or seasonal staff to help with order picking, product shipping and other operational needs. Rental Services allows your business to operate efficiently and maintain your customer satisfaction levels.

Not only can the Intermec Rental Program help with distribution center operations, it can also provide mobile computers and printers to support additional drivers and routes ensuring that your customers receive your goods or services on time.

The Intermec Rental Program is also the ideal solution for trade shows, product showcases or occasional business events. Provide mobile computers to all of your staff without removing devices from your field-based operations or disrupting ongoing business activities.

Business Continuity and Predictability

Managing your capital resources and expenditures is essential to running a profitable and successful business in a competitive market place. Buying mobile computing equipment that isn't fully utilized throughout the year impacts your bottom line.

The Intermec Rental Program allows you to reserve mobile computing equipment months in advance, enabling you to plan ahead and remove some of the uncertainty of seasonal needs. With established hardware and trusted operating systems in the available devices, the Intermec Rental Program will provide you with reliable performance and consistent productivity when demands increase and your operations expand.

CK3 Rental Solution

The CK3B packs a breadth of capabilities into a slim, well balanced case. The CK3B embeds Intermec's latest generation of imaging technology to deliver fast 1D and 2D barcode scanning, unmatched performance on poor quality and damaged barcodes, and unmatched flexibility in scanning range—perfect for distribution centers or in-store settings. The CK3 rental offering consists of devices with alpha-numeric-keypads, pre-loaded with Intermec Terminal Emulation and a choice of either the EX25 near/far imager or the EV12 arm's length linear imager. Each CK3 ships with two batteries and a snap-on power adapter.

CK71 Rental Solution

The CK71 ultra-rugged mobile computer is perfect for the most demanding warehouse and distribution environments. The no compromise, next generation design achieves true functional agility with the perfect balance of ruggedness, duty cycle and ergonomics. The CK71 rental offering consists of devices pre-loaded with Intermec Terminal Emulation and featuring alpha-numeric keypads. Each CK71 ships with two batteries and can be rented with either the EA30 or the EX25 near/far imager.

CN3 Rental Solution

Built to survive the rigors of the road, the CN3 allows companies to dynamically deploy the right resources to the right location, and enabling their transportation or field service mobile workers to tap into the information they need to work most effectively. The CN3 rental solution will allow you to add more drivers or field technicians and more routes to increase your responsiveness without additional capital expenditures. The CN3 rental solution is offered with a numeric keypad, the EA11 arm's length imager, and will ship with two batteries.

CN50 Rental Solution

Similar to a smartphone in size, shape and weight, the CN50 mobile computer is optimized for field service and direct store delivery applications where size, weight and high quality communications count. The CN50 offers 3.75G wide area wireless connectivity in addition to WLAN, Bluetooth and GPS. All devices are equipped with a QWERTY keypad and are ready to use within minutes of taking them out of the box. The CN50 rental solution ships with two batteries, a snap on power adapter, and can be rented with the either the EA11 or the EA21 imager.

Other Rental Solutions

Contact your local Intermec representative and ask them to provide a custom rental solution for your individual needs.

Accessory Options

You can also rent the accessories that make your business run such as scan handles, 4-slot battery chargers, vehicle chargers and magnetic stripe readers.

Service Options

All rentals include a Medallion® Contract providing you with coverage for normal wear and tear that may occur over a rental period. You can also upgrade your coverage to Intermec's best-in-class Medallion Complete for comprehensive coverage including any damage sustained while being used as intended in the work environment.

Returning Equipment

After the project has ended, simply ship the equipment back to either your local Intermec partner or directly to our rental depot. Once the units are received, they will be inspected and reset back to their standard settings and configuration. Any software that was loaded will be removed.

For more information, please contact your local Intermec Representative or an authorized Intermec Partner.
