A Complete Range of Printers to Fit Any Application and Printing Environment

- **Industrial Printers**
  The built-in "smarts" of Honeywell fixed printers means greater efficiency and lower cost for all high-demand printing needs.

- **Desktop Printers**
  Quiet, compact, intuitive and reliable – with a range of configurations. The clear choice for a wide variety of light-duty labeling applications.

- **Mobile Printers**
  Designed to withstand punishing field conditions, these mobile printers allow a full day of printing without recharging.

- **RFID Printers**
  Print and encode smart labels to enable RFID tracking for quick and accurate data collection.

- **Printer Software**
  Supports printer management, bi-directional communication, network connectivity and label design.

- **Media Supplies**
  Labels, receipts, tags and ribbons support a broad range of needs, even in the toughest environments.

- **Datamax-O'Neil Range**
  Complete information on Datamax-O'Neil by Honeywell printers.

Honeywell Completes Acquisition of Datamax-O'Neil

Extract from Honeywell Press Release on March 2, 2015

- Positions Honeywell Scanning & Mobility to Expand in the $1.5B Global Barcode Printing Segment
- Acquisition Builds on Existing Printing Capabilities Acquired with Intermec
- Datamax-O'Neil Portfolio of Solutions Augments Honeywell's Ability to Deliver Enhanced Workflow Performance

Honeywell today announced that it has completed its acquisition of Datamax-O'Neil, a global manufacturer of fixed and mobile printers used in a variety of retail, warehouse and distribution, and healthcare applications. The $185 million deal was announced in December of 2014.

"Today is an exciting day for Honeywell and Datamax-O'Neil as we join together to meet and exceed the needs of our combined customers while staking out a leadership role in the estimated $1.5 billion global barcode printing segment," said John Waldron, president, Honeywell Scanning & Mobility.

The PD43/PD43c Light Industrial Printers

Our newest industrial printers are our most compact and affordable yet!

Combining the reliability of an industrial-class product with the simplicity of a desktop printer, the PD43 and the compact PD43c printers are designed for use in the distribution center, transportation (including airline passenger service), retail and healthcare industries. These new printers allow workers to conduct business-critical tasks such as airline ticketing, baggage tag printing, shelf label printing and pharmaceutical label printing.

"VDC's research shows that ease of use, reliability, and price-performance ratio are critical AIDC technology investment determinants."
"The demand for out-of-the-box ready industrial label printers is growing as IT managers are tasked with adopting solutions that enhance operational efficiencies. With its ergonomic and affordable PD43 series, Honeywell is poised to capitalize on today's massive mid-market opportunity."
    – Richa Gupta, Senior Analyst, Auto-ID & Data Capture, VDC Research

"The PD43 and even-smaller PD43c pack our latest printing technology into a compact yet rugged package. Unlike competing products that force a choice between price and performance, these new printers can scale with growing businesses at an accessible price point, helping organizations mind their bottom line without sacrificing performance."
— Juan Picon, Vice President and General Manager, Scanning, Printing and Media,
Honeywell Sensing and Productivity Solutions

Designed from the ground up to deliver no-compromise printing performance in the smallest footprint possible, the PD43 and PD43c provide industrial-class printing reliability, a simple and intuitive user interface and renowned Smart Printing capabilities — all in an affordable package.

Features

- **Incredibly Compact:** Small footprint for installation into compact tabletops and pull-out cabinets.

- **Built Strong:** Rugged metal chassis and print mechanism provide investment protection.

- **Easy to Use:** Intuitive, 10-language color display or icon interface simplifies setup and maintenance.

- **Built-In Command Languages:** Supports ESim, ZSim, DSim, IPL and Direct Protocol right out of the box.

- **Smart Printer:** Run apps right inside the printer, control peripherals and eliminate the need for a connected PC, using either C# for Printers or Fingerprint.

- **Maintenance Made Easy:** Completely tool-free printhead and platen roller replacement.

- **Broad Media Compatibility:** Supports half- and one-inch ribbon cores, ink-in or ink-out.

- **Co-Engineered Media:** Extensively tested with Honeywell co-engineered media products, ensuring optimized performance. Compatible with the broad range of Honeywell media products.

- **Available Accessories:** Customize with a wide range of available accessories such as a Wi-Fi/Bluetooth® module and cutter.
