A Complete Range of Scanners to Fit Any Application and Scanning Environment

Our Honeywell scanners are used in a wide variety of vertical markets around the world, including retail, healthcare and transportation and logistics. From retail checkout to hospital patient care to warehouse management, Honeywell barcode scanners are purpose-built to meet the varied demands of users in virtually every scanning environment, and work seamlessly with our full AIDC product range.

- **Handheld Barcode Scanners**
  Provide intuitive scanning of the barcodes found in real-world environments, driving increased accuracy for end users.

- **Industrial Barcode Scanners**
  Constructed to last for many years, Honeywell industrial-grade barcode scanners offer superior durability and reliability, even in challenging working environments.

- **Wireless Barcode Scanners**
  Wireless barcode scanners designed to allow mobile employees to efficiently and effectively scan barcodes in challenging environments.

- **Hands-Free Barcode Scanners**
  These trusted presentation scanners increase productivity, lower operational costs and ensure reliable scan performance every time.

- **Healthcare Barcode Scanners**
  Your choice of best-in-class scanners for healthcare organizations looking to improve patient safety while enhancing clinician productivity.

- **In-Counter Scanners**
  Enable cashiers to aggressively scan barcodes in high-volume retail and grocery environments, resulting in increased throughput, profitability and customer satisfaction.

- **2D Barcode Scanners**
  Offers exceptional reading of both linear 1D and 2D barcodes, ensuring that your business is equipped to meet the data capture needs of today and tomorrow.
