

Introducing the New CN51.

Collect data faster. Expand your capabilities. Surpass customer expectations. All this and more with the CN51. Future-proof your enterprise with the unique ability to migrate from Windows to the Android operating system - all without having to purchase new or additional hardware.

The Intermec CN51 is an important tool for customizing just the right strategy for your water meter data collection needs. With Datazeo's M2M subscription fee structure you now have a sensible and affordable path to AMI.
