

**Same PM Series performance,  
now in a smaller footprint.**

As the most compact addition to the PM Series mid-range industrial printer family, the PM23c two-inch label printer is ideal for retail product labeling, including food and produce traceability applications. And since it's a PM Series, it shares the same best-in-class throughput, quick deployment, and reliability for maximum uptime—now in an even smaller footprint ideal for space-constrained applications.

**Visit us online** or call Partner Name and Phone Number and learn more about the new Intermec PM Series mid-range printers.
