The Answer to the Industry's Need for No Compromise Rugged Mobile Computing

In light of this data, you might have also heard about the recently launched Intermec 70 Series, Intermec's next generation portfolio of ultra-rugged mobile computers. These powerful devices represent the smallest and lightest form factors in their respective classes. Each product in the series is built to help businesses optimize resources to improve operational efficiency, support future growth, and deliver high customer satisfaction.

Compare and assess your needs to the capabilities of the 70 Series.
