

Your Ticket to Automation

Increase productivity and revenue, cut costs and improve officer safety with Intermec e-Citation Solutions

View case studies:

» San Jose Police Department

» Snohomish County Sheriff's Office

You know the hand-written traffic and parking ticket process can be time consuming and error-prone. It is subject to handwriting interpretation and requires the extra step of data entry into the traffic enforcement system.

Reducing errors can significantly decrease the number of tickets dismissed and increase payment yield without actually writing any more tickets. Benefit from automated solutions that will increase productivity, efficiency and most importantly improve officer safety.

Intermec is the industry's only single source provider of e-Citation hardware solution for public service and safety departments, including local, state and federal police agencies. Our comprehensive solution can:

- Improve officer safety
- Reduce the time it takes to issue & process citations
- Deliver real time access to database files & GPS systems
- Enhance efficiencies and cut costs

Our comprehensive line of small, lightweight and rugged mobile computers, printers and scanners can be held in one hand, leaving a hand free for critical needs. With quick, reliable citation processing and printing, the exposure time of officers at roadside is reduced.

Contact us today and learn how quickly we can deploy your Intermec e-Citation solution and possible state and federal grants available to fund your implementation.
