Vocollect Speech Recognition Headsets

Vocollect SR Series Speech Recognition Headsets

In the world of distribution, where productivity can be measured in seconds, team members can't afford to miss hearing a single assignment, or be burdened with repeating responses. When every second counts, Vocollect's speech recognition headsets provide the performance you need in even the most demanding industrial environments.

Auto Operator Load

Only Vocollect headsets offer the automatic operator load feature which recognizes the operator's headset and loads their voice template for a faster startup; saving you time and money every day.

Adjustable Headset Options

Accommodates 95% of worker head sizes.

Waterproof Noise-Canceling Microphone

Delivers optimal speech recognition performance.

- To maximize first-time speech recognition accuracy, the SR Series comes equipped with a custom high-performance, noise-canceling microphone. One side provides for high-quality speech input and the other side eliminates interference from workplace noise.
- A talk-side visual indicator makes it easy for your team to know they are speaking into the correct side of the microphone.

Padded Headband

Keeps headset in place & provides comfort during extended work shifts.

Microphone Boom

Delivers optimal speech recognition performance.

- Three-position Speech Groove™ and rotating boom makes it easy to maintain the proper angle for repeatable positioning of the microphone.
- Provides a single headset solution to wear on either ear simply by rotating the microphone boom.
- A retention feature keeps the moisture-resistant coated windscreen in place.

Connector Options

Industrial-grade Breakaway Connector

- When the cable is connected to a Talkman, Vocollect's patented breakaway connector separates cleanly from the Talkman if it is subject to unusual strain. This increases safety for the operator and decreases the potential for equipment damage.

- Maximizes audio quality via an extremely secure connection.

Consumer-grade Audio Jack

- Tested to provide approximately one year of industrial use.

Wireless Freedom - SRX Headset

The Vocollect SRX Bluetooth® headset offers industrial quality wireless freedom for use with the Talkman A500, T5, Vehicle Mounted Talkman (VMT) and other selected platforms.

Vocollect SL Series Speech Recognition Headsets

The SL Series of lightweight industrial headsets complements the rugged industrial SR Series. Offering a lighter, non-repairable alternative for less demanding applications, this series of headsets is ideal for customer-facing employees performing distribution tasks through voice, such as working in stockrooms and performing inventory-checking activities in retail establishments.

Comparing the SL and SR Series Headsets

Feature	SL Series	SR Series
Speech Recognition	Very Good	Excellent
Operator ID	Yes	Yes
Repairable	No	Yes
Warranty	One Year	One Year
Service Plan Available	No	Yes
Temperature Range	Ambient	Full DC -Freezing/Ambient
Use in noisy environment	Yes -Moderate	Yes - Extreme
Right/Left Orientation	Based on Model	Either - One Model
'Speech Groove' for repeatable microphone positioning	No	Yes
Microphone Orientation Cue	Yes	Yes
Fully Replaceable Pads	No	Yes
Range of Adjustment (Over the head models)	Wide - Behind the head only	Wide
