

Vocollect SRX Speech Recognition Headset

Wireless Freedom in the Warehouse

In the world of distribution, where productivity can be measured in seconds, team members can't afford to miss hearing a single assignment, or be burdened with repeating responses. The Vocollect SRX Speech Recognition Headset, the world's first featuring industrial grade use of Bluetooth[®] Wireless Technology, offers your team freedom to perform like never before.

Maximum Performance

With intelligence to manage the quality of voice input/output now in the headset, no cables to connect, and mobility up to 30 feet (10 meters) away from a mobile computer, your team will deliver maximum performance.

Adjustment Strap

- Accommodates 95% of worker head sizes.

Comfortable Ear Cup

- Soft ear pad and mounting disk keeps team members comfortable, even on extended shifts.
- Both the ear pad and mounting cup are easily replaced.

Microphone Positioning

- Three-position Speech Groove[™] and rotating boom makes it easy to maintain the proper angle for repeatable positioning of the microphone.
- Boom rotates 280° degrees, enabling headset to be worn on either ear.
- Fully adjustable arm makes it easy to find a comfortable angle.

Exceptional Wireless Audio Quality

- Increases flexibility: the device to which the SRX headset is paired can be body worn, truck mounted, etc. - up to 30 feet (10 meters) away.
- Prevents 'snarfing' or eavesdropping between Bluetooth[®] wireless technology devices.
- Accommodates team members working in close proximity.

Padded Headband

- Keeps headset in place and provides comfort during extended work shifts.
- For added stability, an optional strap is included for securing the headset behind the head.

Full Shift+ Battery

- Delivers full shift of continuous speech performance, enabling use for multiple shifts.

Waterproof Microphone

- Retention feature keeps the moisture-resistant microphone cover in place.
- Talk side visual indicator makes it easy to confirm the right side of the microphone is being used.
- Cancellation eliminates industrial noise: compressors, horns, machines, etc.

- Fast shift start as lengthy login is eliminated; a smart chip in the SRX tells the device which team member is using it; with a quick password, work begins in seconds.
- Fast configuration with two pairing options: a simple button press routine or 'close proximity' pairing.
- Meets international standards for body-worn radio frequency devices.
